## STEFANIA BOTTLE

**Original, unique, innovative, modern:  
here is the ideal set to give a new look to nail polish!**

The new Baralan nail polish set composed of the Stefania bottle, 15 ml and the Overcap Naviglio, has been imagined with a design that is both unusual and functional.

The Overcap covers a good part of the bottle hiding the perceived imperfection created by the security air bubble necessary for product expansion. As an additional bonus, black and white versions protect against UV rays making the cap useful for Gel Polish. Powder coat only the visible part and the customer can still view the polish color.

Its surface, wider than a normal cap, is ideal for decoration and particular personalization. It can be used also as a support base for nail polish application.

This bottle is characterized by a thicker distribution of glass on the bottom that makes it more precious and unique.

### **Baralan International S.p.a.**

Baralan, for more than 50 years, synonymous with passion, innovation, quality and efficiency in the cosmetic packaging world, offering a wide range of standard glass and plastic containers for color cosmetics, fragrance and skin care, easily customizable and widely distributed throughout the world.
